

GOLDQUEST

TSXV: GQC

Gold and Copper Development in the Dominican Republic

Indicated resource of 2.4 Million oz. Gold equivalent

Inferred resource of 0.8 Million oz. Gold equivalent

10,000 metre exploration drill program now underway

\$8.2 million in cash (at June 30, 2014 - end of Q2 2014)

- sufficient for 2014 programs and beyond

PEA completed - AISC at \$353/oz

Developing Resources in and above the ground

GoldQuest is a Canadian based mineral exploration company focused on gold and copper development in the Dominican Republic.

In 2012, GoldQuest discovered the Romero deposit including drilling highlights of 235 metres @ 7.9 g/t gold (uncut) and 1.4% copper.*

Led by a strong management team with proven mining experience in the Dominican Republic, GoldQuest is currently developing its' 100% owned Romero Project, as well as advancing the Tiroo Project through further exploration.

Definitions: "PEA" Preliminary Economic Assessment; "NPV" Net Present Value; "IRR" Internal Rate of Return; "AISC" All In Sustaining Costs

Certain technical information on this factsheet was taken from the technical report entitled "A Mineral Resource Estimate for the Romero Project, Tiroo Property, Province of San Juan, Dominican Republic" dated December 13, 2013 (effective date of resource October 29, 2013), prepared by B. Terrance Hennessey, P.Geo., Ing. Alan J. San Martin, MAusIMM (CP) and Richard M. Gowans, P.Eng. of Micon International Limited, and is subject to all of the assumptions, qualifications and procedures described therein.

The Romero Project

Romero is made up of two Gold-Copper deposits, with drilling results that included high-grade indicated core of 6.23 million tonnes grading 6.9 g/t gold equivalent, containing 1,386,000 ounces of gold equivalent, and continues to show potential for additional resources. The Preliminary Economic Assessment (PEA) was completed in early 2014, and suggests a low AISC (All-In Sustaining Cost) operating cost of \$353/oz (for an underground operation producing 90,000 ounces of gold and 15.6 million pounds of copper per year.

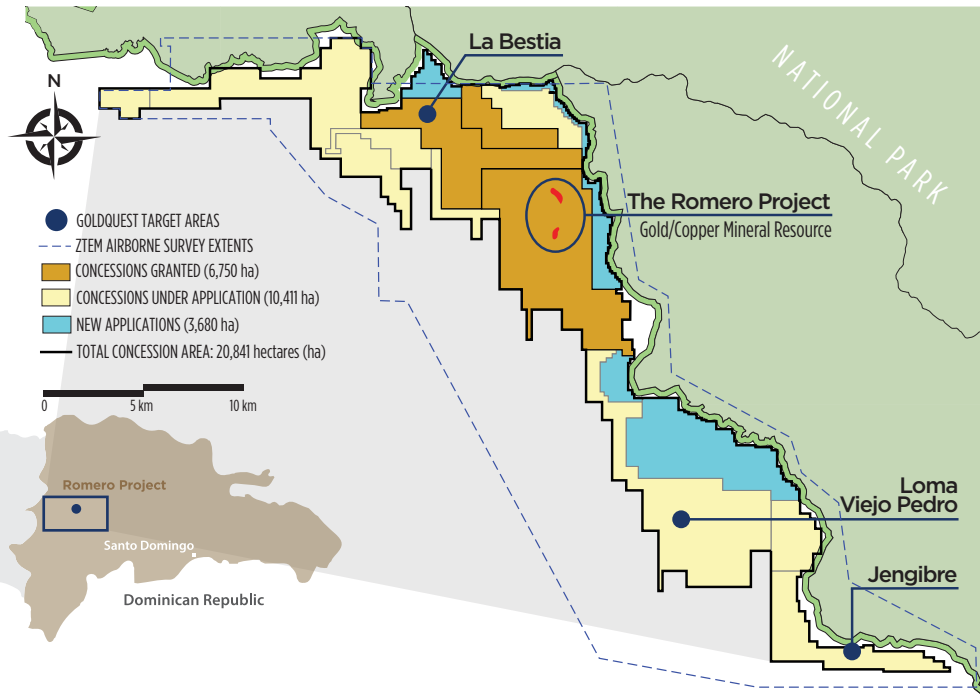

The Tiero Project

GoldQuest continues to explore the Tiero belt surrounding Romero, following a systematic exploration process, seeking additional mineral resources similar to Romero. In early 2014, a comprehensive airborne electromagnetic (ZTEM) survey was completed over the entire land package to identify favourable trends. Following up from the ZTEM survey, a ground IP and mapping program were initiated to further define drilling targets, using the geophysical fingerprint that was used to find Romero. The exploration program for the Tiero Project includes a 10,000 metre drilling program, that is underway.

Romero Project N1 43 101 Mineral Resources

Category	Zone	Tonnes	Au(g/t)	Cu(%)	Zn(%)	Ag(g/t)	AuEq(g/t)	Au Ounces	AuEq Ounces
Indicated	Romero	17,310,000	2.55	0.68	0.30	4.0	3.81	1,419,000	2,123,000
	Romero South	2,110,000	3.33	0.23	0.17	1.5	3.8	226,000	258,000
Total Indicated Resources		19,420,000	2.63	0.63	0.29	3.7	3.81	1,645,000	2,381,000
Inferred	Romero	8,520,000	1.59	0.39	0.46	4.0	2.47	437,000	678,000
	Romero South	1,500,000	1.92	0.19	0.18	2.3	2.33	92,000	112,000
Total Inferred Resources		10,020,000	1.64	0.36	0.42	3.8	2.45	529,000	790,000

Mineral resources that are not mineral reserves do not have demonstrated economic viability. There is no certainty that the mineral resources will be categorized as mineral reserves. Mineral Resources from Romero and Romero South Estimated by Micon International Limited. Technical Report Published December 13th 2013 (effective date October 29, 2013).

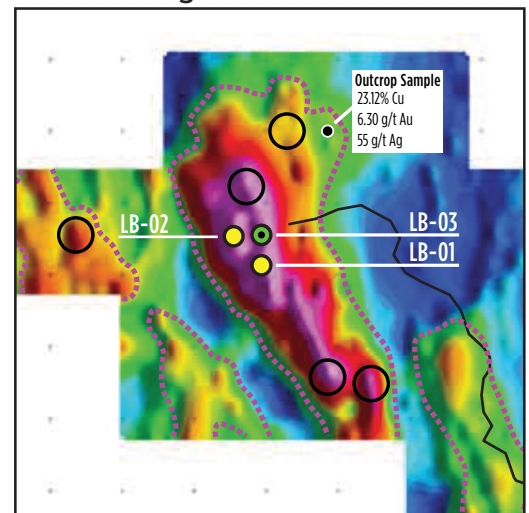

Why GoldQuest?

- We discovered Romero [\$471M Pre-tax NPV (5%) underpins valuation]
- We are valued at only \$7/oz of M&I gold (net of cash)
- We have \$8.2 million cash
- We have the largest and most prospective land package in the Tiero formation
- We know how to find hydrothermal systems
- We are drilling
- Lowest valuation since discovery
