GoldQuest Mining Corp.

Notes to the Condensed Consolidated Interim Financial Statements (unaudited)

For the Three Months Ended March 31, 2024

(Expressed in Canadian Dollars)

1. CORPORATE INFORMATION AND CONTINUANCE OF OPERATIONS

GoldQuest Mining Corp. (the “Company” or “GoldQuest”) is a publicly listed company incorporated in British Columbia on July 12, 1989 and its shares are listed on the TSX Venture Exchange under the symbol “GQC”. The Company together with its subsidiaries (collectively referred to as the “Company”) is engaged in the identification, acquisition and exploration of mineral properties. The Company’s registered office is located at Suite 2600, 595 Burrard Street, Vancouver, British Columbia, V7X 1L3.

The business of mining and exploring for minerals involves a high degree of risk and there can be no assurance that current exploration programs will result in profitable mining operations. The recoverability of the carrying value of evaluation and exploration properties and the Company's continued existence is dependent upon the preservation of its interest in the underlying properties, the discovery of economically recoverable reserves, the achievement of profitable operations, or the ability of the Company to raise alternative financing, if necessary, or alternatively upon the Company's ability to dispose of its interests on an advantageous basis. Changes in future conditions could require material write-downs of the carrying values. The Company's exploration assets are located outside of Canada and are subject to the risk of foreign investment, including political uncertainty, increases in taxes and royalties, renegotiation of contracts and currency exchange fluctuations.

Although the Company has taken steps to verify title to the properties on which it is conducting exploration and in which it has an interest, in accordance with industry standards for the current stage of exploration of such properties, these procedures do not guarantee the Company’s title. Property title may be subject to unregistered prior agreements, unregistered claims, other land claims and non-compliance with regulatory and environmental requirements.

These unaudited condensed consolidated interim financial statements have been prepared on the assumption that the Company and its subsidiaries will continue as a going concern, meaning it will continue in operation for the foreseeable future and will be able to realize assets and discharge liabilities in the ordinary course of operations. Different bases of measurement may be appropriate if the Company is not expected to continue operations for the foreseeable future. As at March 31, 2024, the Company had not advanced its property to commercial production and is not able to finance day to day activities through operations. The Company’s continuation as a going concern is dependent upon the successful results from its mineral property exploration activities and its ability to attain profitable operations and generate funds there from and/or raise equity capital or borrowings sufficient to meet current and future obligations. Management intends to fund operating costs over the next twelve months with cash and cash equivalents and through further equity financings.

The unaudited condensed consolidated interim financial statements of GoldQuest for the three months ended March 31, 2024 were approved by the Board of Directors on May 30, 2024.

2. MATERIAL ACCOUNTING POLICIES AND BASIS OF PREPARATION

Statement of compliance to International Financial Reporting Standards

These unaudited condensed consolidated interim financial statements of the Company have been prepared in accordance with IFRS Accounting Standards (“IFRS”) issued by the International Accounting Standards Board (“IASB”). These financial statements comply with International Accounting Standard 34, Interim Financial Reporting.

Basis of presentation

These unaudited condensed consolidated interim financial statements include the accounts of GoldQuest and its subsidiaries. This interim financial report does not include all of the information required of a full annual financial report and is intended to provide users with an update in relation to events and transactions that are significant to an understanding of the changes in financial position and performance of the Company since the end of the last annual reporting period. It is therefore recommended that this financial report be read in conjunction with the annual financial statements of the Company for the year ended December 31, 2023.

New accounting standards

Certain IFRS pronouncements that are mandatory for accounting years beginning on or after January 1, 2024 have been issued. The Company concludes that the effect of such amendments did not have a material impact and therefore did not record any adjustments to the financial statements.

3. JOINT OPERATION

On January 17, 2020, the Company entered into a joint agreement with Precipitate Gold Corporation that is accounted for as a joint operation under IFRS 11 Joint Arrangements. The purpose of the joint operation was to acquire exploration equipment that can be used by both parties on their respective projects.

The joint operation was made through the incorporation of Toro Negro drilling S.R.L (“Toro Negro”), a company incorporated under the laws of the Dominican Republic on January 30, 2020. The participating interests of both parties at the time of the joint operation is 50% with each party responsible for payment of its proportionate share of operating and capital costs. Upon formation of the joint operation, a management committee (the “Management Committee”) consisting of two representatives of each party and holding voting rights in accordance with each party’s participating interest, was established which shall make all decisions which are required to be made by the joint operation participants.

The Management Committee shall be responsible for managing the exploration equipment acquired.

4. CASH AND CASH EQUIVALENTS

The Company’s cash and cash equivalents are broken down as follows:

	March 31, 2024	December 31, 2023
	\$	\$

7. EVALUATION AND EXPLORATION ASSETS

Dominican Republic – 100% owned

On August 5, 2009, the Company entered into a purchase agreement with Gold Fields Dominican Republic BVI Limited (“GFL”) to acquire its gold-focused portfolio (“Tireo Property”) in the Dominican Republic. As consideration for GFL’s interest in the joint venture projects, the Company issued 8,600,000 common shares and granted a 1.25% Net Smelter Royalty (“NSR”) on the claims in favour of GFL. The transaction was completed on November 18, 2009 with the issuance of the shares at a fair value of \$1,247,000.

In October 2015, GoldQuest submitted an Exploitation Application to advance the 100% owned Romero Project in the Dominican Republic. The Company received notification in January 2018 that the Minister of Energy and Mines (“MEM”) of the Dominican Republic has approved GoldQuest’s Exploitation Permit Application. The Application has been sent to the President for ratification, which is required prior to receiving the final Exploitation Permit. The Exploitation Permit would give the Company the rights to the property for 75 years, with a Tax Stability Agreement that freezes the tax treatment for the project for a minimum of 25 years which is protected under the current Mining Law. After receipt of the Exploitation Permit, the Company will be required to complete an Environment Assessment and receive an Environmental License from the Ministry of Environment prior to the start of construction activities.

The Company received notice that a group of individuals in the Dominican Republic filed a claim against the Company’s wholly owned subsidiary, GoldQuest Dominicana SRL, regarding the Romero project. The Penal Chamber of the First Instance Court of the Judicial District of San Juan de la Maguana reached a decision in late March 2018; however, the only information the Company received regarding the decision is a verbal summary of the decision that was delivered by a Court clerk. The written decision of the court, including the reasons for the decision, was received in early April 2018. Upon review of the written decision by the Company’s outside legal counsel, the decision simply restates the existing legal requirements under present Mining Law 146 and hence has no effect on the operations of the Company or its plans going forward. The injunction is limited to the Exploitation Permit Application for the Romero Concession and does not relate to the Company’s exploration licenses.

During the year ended December 31, 2018, the Company decided to impair the evaluation and exploration assets by \$1,246,999 to a nominal amount of \$1. The Impairment is based on guidance outlined in IFRS 6, Exploration for and Evaluation of Mineral Resources and IAS 36, Impairment of Assets.

On June 26, 2019, the Ministry of Energy and Mines of the Dominican Republic (“MEM”) granted a new Exploration License to the Company. The Piedra Dura Exploration License is located north of the Romero Project.

As of March 31, 2024, the Company has not received the Exploitation Permit nor clarification from the Dominican Republic’s government on any timeframe for receipt of the Exploitation Permit.

14. CAPITAL MANAGEMENT

The Company's objectives when managing capital are to safeguard its ability to continue as a going concern in order to pursue the evaluation and exploration of its mineral exploration properties and to maintain a flexible capital structure, which optimizes the costs of capital at an acceptable risk. In the management of capital, the Company includes the components of share capital.

There were no changes to the Company policy for capital management during the three months ended March 31, 2024.

The Company manages the capital structure and adjusts it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust its capital structure, the Company may issue new shares, acquire or dispose of assets, or adjust the amount of cash and cash equivalents and short-term investments. In order to maximize ongoing development efforts, the Company does not pay out dividends. The Company and its subsidiaries are not subject to any externally imposed capital requirements.

The Company's investment policy is to invest its excess cash in very low risk financial instruments such as term deposits or by holding funds in high yield savings accounts with major Canadian banks. By using this strategy, the Company preserves its cash resources and can marginally increase these resources through the yields on these investments. The Company's financial instruments are exposed to certain financial risks, which include currency risk, credit risk, liquidity risk and interest rate risk.

The Company expects that its current capital resources will be sufficient to fund its present operational commitments and working capital needs for the coming twelve months.

15. FINANCIAL INSTRUMENTS

Fair value

The carrying values of cash and cash equivalents, amounts receivable, deposits and accounts payable and accrued liabilities approximate their fair values due to the relatively short period to maturity of those financial instruments. Long-term investments are determined by the closing market price of the securities held by the Company.

Financial instruments recorded at fair value on the consolidated statements of financial position are classified using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. The three levels of the fair value hierarchy are as follows:

Level 1: Unadjusted quoted prices in active markets for identical assets or liabilities;

Level 2: Inputs other than quoted prices included in Level 1 that are observable for the asset or liability either directly (i.e., as prices) or indirectly (i.e., derived from prices); and

Level 3: Inputs that are not based on observable market data.

As at March 31, 2024 and December 31, 2023, the financial instrument recorded at fair value on the consolidated statement of financial position are cash and cash equivalents and long-term investment which are measured using Level 1 of the fair value hierarchy.

15. FINANCIAL INSTRUMENTS (CONTINUED)

Financial risk management

Credit risk

Credit risk is the risk of an unexpected loss if a third party to a financial instrument fails to meet its contractual obligations. The Company manages its credit risk through its counterparty ratings and credit limits.

The Company's cash and cash equivalents are primarily held through large Canadian financial institutions. Guaranteed investment certificates are composed of financial instruments issued by Canadian banks and companies with high investment-grade ratings. These instruments mature at various dates over the current operating period and are cashable on the maturity date.

The total cash and cash equivalents and amounts receivable represent the maximum credit exposure. The Company limits its credit risk exposure by holding cash and cash equivalents with reputable financial institutions with high credit ratings. The Company's amounts receivable balance is not significant and does not represent significant credit exposure as it is principally due from the Government of Canada.

Liquidity risk

Liquidity risk is the risk that an entity will encounter difficulty in raising funds to meet commitments associated with financial instruments. The Company manages liquidity by maintaining adequate cash balances to meet liabilities as they become due.

The Company maintained sufficient cash and cash equivalents as of March 31, 2024 in the amount of \$8,902,040, in order to meet short-term business requirements. As of March 31, 2024, the Company had accounts payable and accrued liabilities of \$226,239. All accounts payable and accrued liabilities are current.

Market risk

The significant market risks to which the Company is exposed are interest rate risk, currency risk, other price risk, and commodity price risk.

- Interest rate risk

Interest rate risk is the risk that the fair value or the future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company's cash and cash equivalents are held mainly in high yield saving accounts and term deposits and therefore there is currently minimal interest rate risk. Because of the short-term nature of these financial instruments, fluctuations in market rates do not have a significant impact on estimated fair values as of March 31, 2024.

The Company's interest rate risk principally arises from the interest rate impact of interest earned on cash and cash equivalents. A 1% change in interest rates on cash and cash equivalents outstanding as of March 31, 2024 would result in an approximately \$90,000 change to the Company's loss for the three months ended March 31, 2024.

Financial risk management (continued)

Market risk (continued)

- Currency risk

The Company is exposed to currency risk to the extent that monetary assets and liabilities held by the Company are not denominated in Canadian dollars. The Company has not entered into any foreign currency contracts to mitigate this risk.

The Company's cash and cash equivalents, amounts receivable, accounts payable and accrued liabilities and long-term investments are held in Canadian Dollars ("CA\$"), US Dollars ("US\$") and Dominican Pesos ("RD\$" or "DOP"); therefore, USD and DOP accounts are subject to fluctuation against the Canadian dollar.

The Company had the following balances in foreign currency as at March 31, 2024:

	CA\$	US\$	RD\$
Cash and cash equivalents	8,773,327	10,423	5,051,102
Amounts receivable	6,440	6,962	2,266,645
Deposits	4,350	500	793,420
Long-term investments	18,000	-	-
Accounts payable and accrued liabilities	(79,682)	(25,008)	(4,967,161)
	8,722,435	(7,123)	3,144,006
Rate to convert to \$1.00 CA\$	1.00	1.35	0.02
Equivalent to CA\$	8,722,435	(9,644)	71,332

Based on the above net exposures as of March 31, 2024, and assuming that all other variables remain constant, a 10% appreciation or depreciation of the CA\$ against the US\$ and DOP would increase/decrease comprehensive loss by \$6,000.

- Other price risk

Other price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices other than those arising from interest rate risk, financial market risk, or currency risk.

As of March 31, 2024, the Company held 300,000 common shares of Precipitate which is publicly traded on the TSX Venture Exchange. A 10% change in share price of Precipitate's shares as of March 31, 2024 would result in a \$1,800 change to the Company's comprehensive loss for the three months ended March 31, 2024.

Other than this, the Company is not exposed to significant other price risk.

- Commodity risk

The Company is exposed to price risk with respect to commodity prices, specifically gold. The Company closely monitors commodity prices to determine the appropriate course of action to be taken by the Company. Commodity prices fluctuate on a daily basis and are affected by numerous factors beyond the Company's control. The supply and demand for these commodities, the level of interest rates, the rate of inflation, investment decision by large holders of commodities including governmental reserves and stability of exchange rates can all cause significant fluctuations in prices. Such external economic factors are in turn influenced by changes in international investment patterns and monetary systems and political developments. As the Company does not have production assets, management believes this risk is minimal.
